SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended July 30, 2023

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission file number: 0-23985

NVIDIA CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

**(State or other jurisdiction of
incorporation or organization)**

94-3177549

**(I.R.S. Employer
Identification No.)**

**2788 San Tomas Expressway, Santa Clara,
California**

(Address of principal executive offices)

95051

(Zip Code)

(408) 486-2000

(Registrant's telephone number, including area code)

N/A

(Former name, former address and former fiscal year if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.001 par value per share	NVDA	The Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares of common stock, \$0.001 par value, outstanding as of August 18, 2023, was 2.47 billion.

WHERE YOU CAN FIND MORE INFORMATION

Investors and others should note that we announce material financial information to our investors using our investor relations website, press releases, SEC filings and public conference calls and webcasts. We also use the following social media channels as a means of disclosing information about the company, our products, our planned financial and other announcements and attendance at upcoming investor and industry conferences, and other matters, and for complying with our disclosure obligations under Regulation FD:

NVIDIA Company Blog (<http://blogs.nvidia.com>)

NVIDIA LinkedIn Page (<http://www.linkedin.com/company/nvidia>)

NVIDIA Facebook Page (<https://www.facebook.com/nvidia>)

NVIDIA Instagram Page (<https://www.instagram.com/nvidia>)

NVIDIA Twitter Account (<https://twitter.com/nvidia>)

In addition, investors and others can view NVIDIA videos on YouTube (<https://www.YouTube.com/nvidia>).

The information we post through these social media channels may be deemed material. Accordingly, investors should monitor these accounts and the blog, in addition to following our press releases, SEC filings and public conference calls and webcasts. This list may be updated from time to time. The information we post through these channels is not a part of this Quarterly Report on Form 10-Q. These channels may be updated from time to time on NVIDIA's investor relations website.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America, or U.S. GAAP, for interim financial information and with the instructions to Form 10-Q and Article 10 of Securities and Exchange Commission, or SEC, Regulation S-X. The January 29, 2023 consolidated balance sheet was derived from our audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023, as filed with the SEC, but does not include all disclosures required by U.S. GAAP. In the opinion of management, all adjustments, consisting only of normal recurring adjustments considered necessary for a fair statement of results of operations and financial position, have been included. The results for the interim periods presented are not necessarily indicative of the results expected for any future period. The following information should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023.

Significant Accounting Policies

There have been no material changes to our significant accounting policies disclosed in Note 1 - Organization and Summary of Significant Accounting Policies, of the Notes to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023.

Fiscal Year

We operate on a 52- or 53-week year, ending on the last Sunday in January. Fiscal years 2024 and 2023 are both 52-week years. The second quarters of fiscal years 2024 and 2023 were both 13-week quarters.

Reclassifications

Certain prior fiscal year balances have been reclassified to conform to the current fiscal year presentation.

Principles of Consolidation

Our condensed consolidated financial statements include the accounts of NVIDIA Corporation and our wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ materially from our estimates. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, cash equivalents and marketable securities, accounts receivable, inventories, income taxes, goodwill, stock-based compensation, litigation, investigation and settlement costs, restructuring and other charges, property, plant, and equipment, and other contingencies. These estimates are based on historical facts and various other assumptions that we believe are reasonable.

In February 2023, we completed an assessment of the useful lives of our property, plant, and equipment. Based on advances in technology and usage rate, we increased the estimated useful life of a majority of our server, storage, and network equipment from three to a range of four to five years, and our assembly and test equipment from five to seven years. This change in accounting estimate became effective at the beginning of fiscal year 2024. Based on the carrying amounts of a majority of our server, storage, network, and assembly and test equipment, net, in use as of the end of fiscal year 2023, the effect of this change in estimate for the three months ended July 30, 2023 was a benefit of \$5 million and \$28 million for cost of revenue and operating expenses, respectively, which resulted in an increase in operating income of \$33 million and net income of \$27 million after tax, or \$0.01 per both basic and diluted share. The effect of this change in estimate for the first half of fiscal year 2024 was a benefit of \$7 million and \$59 million for

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

cost of revenue and operating expenses, respectively, which resulted in an increase in operating income of \$66 million and net income of \$55 million after tax, or \$0.02 per both basic and diluted share.

Note 2 - Business Combination

Termination of the Arm Share Purchase Agreement

In February 2022, NVIDIA and SoftBank Group Corp, or SoftBank, announced the termination of the Share Purchase Agreement whereby NVIDIA would have acquired Arm Limited, or Arm, from SoftBank. The parties agreed to terminate due to significant regulatory challenges preventing the completion of the transaction. We recorded an acquisition termination cost of \$1.35 billion in fiscal year 2023 reflecting the write-off of the prepayment provided at signing.

Note 3 - Leases

Our lease obligations primarily consist of operating leases for our headquarters complex, domestic and international office facilities, and data center space, with lease periods expiring between fiscal years 2024 and 2035.

Future minimum lease payments under our non-cancelable operating leases as of July 30, 2023 are as follows:

	Operating Lease Obligations
	<i>(In millions)</i>
Fiscal Year:	
2024 (excluding first half of fiscal year 2024)	\$ 134
2025	249
2026	227
2027	211
2028	191
2029 and thereafter	415
Total	1,427
Less imputed interest	178
Present value of net future minimum lease payments	1,249
Less short-term operating lease liabilities	208
Long-term operating lease liabilities	\$ 1,041

In addition, we have operating leases, primarily for our data centers, that are expected to commence between the third quarter of fiscal year 2024 and the end of fiscal year 2025 with lease terms of 3 to 8 years for \$205 million.

Operating lease expenses were \$67 million and \$47 million for the second quarter of fiscal years 2024 and 2023, respectively, and \$126 million and \$90 million for the first half of fiscal years 2024 and 2023, respectively. Short-term and variable lease expenses for the second quarter and first half of fiscal years 2024 and 2023 were not significant.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Other information related to leases was as follows:

	Six Months Ended	
	July 30, 2023	July 31, 2022
	<i>(In millions)</i>	
Supplemental cash flows information		
Operating cash flows used for operating leases	\$ 135	\$ 91
Operating lease assets obtained in exchange for lease obligations	\$ 299	\$ 98

As of July 30, 2023, our operating leases had a weighted average remaining lease term of 6.5 years and a weighted average discount rate of 3.47%. As of January 29, 2023, our operating leases had a weighted average remaining lease term of 6.8 years and a weighted average discount rate of 3.21%.

Note 4 - Stock-Based Compensation

Our stock-based compensation expense is associated with restricted stock units, or RSUs, performance stock units that are based on our corporate financial performance targets, or PSUs, performance stock units that are based on market conditions, or market-based PSUs, and our employee stock purchase plan, or ESPP.

Our Condensed Consolidated Statements of Income include stock-based compensation expense, net of amounts allocated to inventory, as follows:

	Three Months Ended		Six Months Ended	
	July 30, 2023	July 31, 2022	July 30, 2023	July 31, 2022
	<i>(In millions)</i>			
Cost of revenue	\$ 31	\$ 38	\$ 58	\$ 76
Research and development	600	452	1,124	836
Sales, general and administrative	211	159	394	315
Total	<u>\$ 842</u>	<u>\$ 649</u>	<u>\$ 1,576</u>	<u>\$ 1,227</u>

Equity Award Activity

The following is a summary of our equity award transactions under our equity incentive plans:

	RSUs, PSUs, and Market-based PSUs Outstanding	
	Number of Shares	Weighted Average Grant-Date Fair Value Per Share
	<i>(In millions, except per share data)</i>	
Balances, January 29, 2023	45	\$ 158.45
Granted	13	\$ 359.70
Vested restricted stock	(11)	\$ 127.12
Canceled and forfeited	(1)	\$ 194.70
Balances, July 30, 2023	<u>46</u>	<u>\$ 219.47</u>

As of July 30, 2023, there was \$9.69 billion of aggregate unearned stock-based compensation expense. This amount is expected to be recognized over a weighted average period of 2.7 years for RSUs, PSUs, and market-based PSUs, and 1.0 year for ESPP.

Equity awards excluded from diluted net income per share because their effect would have been anti-dilutive	10	33	14	25

(1) Calculated as net income divided by basic weighted average shares.

(2) Calculated as net income divided by diluted weighted average shares.

Note 6 - Income Taxes

Income tax was an expense of \$793 million and \$958 million for the second quarter and first half of fiscal year 2024, respectively, a benefit of \$181 million for the second quarter of fiscal year 2023, and an expense of \$6 million for the first half of fiscal year 2023. The income tax as a percentage of income before income tax was an expense of 11.4% and 10.4% for the second quarter and first half of fiscal year 2024, respectively, a benefit of 38.0% for the second quarter of fiscal year 2023, and an expense of 0.3% for the first half of fiscal year 2023.

The increase in the effective tax rate was primarily due to a decreased impact of tax benefits from the foreign-derived intangible income deduction, stock-based compensation, and the U.S. federal research tax credit, relative to the increase in income before income tax.

Our effective tax rates for the first half of fiscal years 2024 and 2023 were lower than the U.S. federal statutory rate of 21% due to tax benefits from the foreign-derived intangible income deduction, stock-based compensation and the U.S. federal research tax credit.

For the first half of fiscal year 2024, there were no material changes to our tax years that remain subject to examination by major tax jurisdictions. We are currently under examination by the Internal Revenue Service for our fiscal years 2018 and 2019. Additionally, there have been no material changes to our unrecognized tax benefits and any related interest or penalties since the fiscal year ended January 29, 2023.

While we believe that we have adequately provided for all uncertain tax positions, or tax positions where we believe it is not more-likely-than-not that the position will be sustained upon review, amounts asserted by tax authorities could be greater or less than our accrued position. Accordingly, our provisions on federal, state and foreign tax related matters to be recorded in the future may change as revised estimates are made or the underlying matters are settled or otherwise resolved with the respective tax authorities. As of July 30, 2023, we do not believe that our estimates, as otherwise provided for, on such tax positions will significantly increase or decrease within the next 12 months.

Note 9 - Amortizable Intangible Assets and Goodwill

The components of our amortizable intangible assets are as follows:

	July 30, 2023			January 29, 2023		
	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Carrying Amount</u>	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Carrying Amount</u>
	<i>(In millions)</i>					
Acquisition-related intangible assets	\$ 2,642	\$ (1,448)	\$ 1,194	\$ 3,093	\$ (1,614)	\$ 1,479
Patents and licensed technology	453	(252)	201	446	(249)	197
Total intangible assets	<u>\$ 3,095</u>	<u>\$ (1,700)</u>	<u>\$ 1,395</u>	<u>\$ 3,539</u>	<u>\$ (1,863)</u>	<u>\$ 1,676</u>

Amortization expense associated with intangible assets was \$146 million and \$327 million for the second quarter and first half of fiscal year 2024, respectively, and \$182 million and \$336 million for the second quarter and first half of fiscal year 2023, respectively.

The following table outlines the estimated future amortization expense related to the net carrying amount of intangible assets as of July 30, 2023:

	<u>Future Amortization Expense</u>
	<i>(In millions)</i>
Fiscal Year:	
2024 (excluding first half of fiscal year 2024)	\$ 288
2025	554
2026	259
2027	149
2028	36
2029 and thereafter	109
Total	<u>\$ 1,395</u>

In the first half of fiscal year 2024, goodwill increased by \$58 million from an acquisition, and was assigned to our Compute & Networking segment.

Note 10 - Balance Sheet Components

Certain balance sheet components are as follows:

	<u>July 30, 2023</u>	<u>January 29, 2023</u>
	<i>(In millions)</i>	
Inventories (1):		
Raw materials	\$ 1,632	\$ 2,430
Work in-process	1,058	466
Finished goods	1,629	2,263
Total inventories	<u>\$ 4,319</u>	<u>\$ 5,159</u>

- (1) During the second quarter of fiscal years 2024 and 2023, we recorded an inventory provision of approximately \$343 million and \$570 million, respectively, in cost of revenue.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

	July 30, 2023	January 29, 2023
Other Assets:	<i>(In millions)</i>	
Prepaid supply and capacity agreements (1)	\$ 3,008	\$ 2,989
Investments in non-affiliated entities	800	299
Prepaid royalties	375	387
Prepaid cloud services	170	23
Other	148	122
Total other assets	<u>\$ 4,501</u>	<u>\$ 3,820</u>

(1) As of July 30, 2023 and January 29, 2023, there were \$799 million and \$458 million of short-term prepaid supply and capacity agreements included in Prepaid expenses and other current assets, respectively.

	July 30, 2023	January 29, 2023
Accrued and Other Current Liabilities:	<i>(In millions)</i>	
Taxes payable	\$ 2,803	\$ 467
Customer program accruals	1,482	1,196
Excess inventory purchase obligations (1)	870	954
Accrued payroll and related expenses	642	530
Deferred revenue (2)	421	354
Unsettled share repurchases	217	—
Operating leases	208	176
Product warranty and return provisions	168	108
Licenses and royalties	144	149
Other	201	186
Total accrued and other current liabilities	<u>\$ 7,156</u>	<u>\$ 4,120</u>

(1) During the second quarter of fiscal years 2024 and 2023, we recorded an expense of approximately \$232 million and \$650 million, respectively, in cost of revenue for inventory purchase obligations in excess of our current demand projections, and cancellation and underutilization penalties.

(2) Deferred revenue primarily includes customer advances and deferrals related to license and development arrangements, support for hardware and software, and cloud services.

	July 30, 2023	January 29, 2023
Other Long-Term Liabilities:	<i>(In millions)</i>	
Income tax payable (1)	\$ 1,350	\$ 1,204
Deferred income tax	373	247
Deferred revenue (2)	308	218
Licenses payable	127	181
Other	65	63
Total other long-term liabilities	<u>\$ 2,223</u>	<u>\$ 1,913</u>

(1) Income tax payable is comprised of the long-term portion of the one-time transition tax payable, unrecognized tax benefits, and related interest and penalties.

(2) Deferred revenue primarily includes deferrals related to support for hardware and software.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Deferred Revenue

The following table shows the changes in deferred revenue during the first half of fiscal years 2024 and 2023:

	July 30, 2023	July 31, 2022
	<i>(In millions)</i>	
Balance at beginning of period	\$ 572	\$ 502
Deferred revenue additions during the period	713	399
Revenue recognized during the period	(556)	(341)
Balance at end of period	<u>\$ 729</u>	<u>\$ 560</u>

Revenue allocated to remaining performance obligations, which includes deferred revenue and amounts that will be invoiced and recognized as revenue in future periods, was \$717 million as of July 30, 2023. We expect to recognize approximately 44% of this revenue over the next twelve months and the remainder thereafter. This excludes revenue related to performance obligations for contracts with a length of one year or less.

Note 11 - Derivative Financial Instruments

We enter into foreign currency forward contracts to mitigate the impact of foreign currency exchange rate movements on our operating expenses. These contracts are designated as cash flow hedges for hedge accounting treatment. Gains or losses on the contracts are recorded in accumulated other comprehensive income or loss and reclassified to operating expense when the related operating expenses are recognized in earnings or ineffectiveness should occur.

We also enter into foreign currency forward contracts to mitigate the impact of foreign currency movements on monetary assets and liabilities that are denominated in currencies other than the U.S. dollar. These forward contracts were not designated for hedge accounting treatment. Therefore, the change in fair value of these contracts is recorded in other income or expense and offsets the change in fair value of the hedged foreign currency denominated monetary assets and liabilities, which is also recorded in other income or expense.

The table below presents the notional value of our foreign currency forward contracts outstanding:

	July 30, 2023	January 29, 2023
	<i>(In millions)</i>	
Designated as cash flow hedges	\$ 1,138	\$ 1,128
Non-designated hedges	\$ 367	\$ 366

The unrealized gains and losses or fair value of our foreign currency forward contracts was not significant as of July 30, 2023 and January 29, 2023.

As of July 30, 2023, all designated foreign currency forward contracts mature within 18 months. The expected realized gains and losses deferred into accumulated other comprehensive income or loss related to foreign currency forward contracts within the next twelve months was not significant.

During the first half of fiscal years 2024 and 2023, the impact of derivative financial instruments designated for hedge accounting treatment on other comprehensive income or loss was not significant and all such instruments were determined to be highly effective.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 12 - Debt

Long-Term Debt

The carrying value of our outstanding notes, the calendar year of maturity, and the associated interest rates were as follows:

	Expected Remaining Term (years)	Effective Interest Rate	Carrying Value at	
			July 30, 2023	January 29, 2023
(In millions)				
0.309% Notes Due 2023	—	0.41%	\$ —	\$ 1,250
0.584% Notes Due 2024	0.9	0.66%	1,250	1,250

1.55% Notes Due 2028	4.9	1.64%	1,250	1,250
2.85% Notes Due 2030	6.7	2.93%	1,500	1,500
2.00% Notes Due 2031	7.9	2.09%	1,250	1,250
3.50% Notes Due 2040	16.7	3.54%	1,000	1,000
3.50% Notes Due 2050	26.7	3.54%	2,000	2,000
3.70% Notes Due 2060	36.7	3.73%	500	500
Unamortized debt discount and issuance costs			(45)	(47)
Net carrying amount			9,705	10,953
Less short-term portion			(1,249)	(1,250)
Total long-term portion			\$ 8,456	\$ 9,703

All our notes are unsecured senior obligations. All existing and future liabilities of our subsidiaries will be effectively senior to the notes. Our notes pay interest semi-annually. We may redeem each of our notes prior to maturity, subject to a make-whole premium as defined in the applicable form of note.

On June 15, 2023, we repaid the 0.309% Notes Due 2023.

As of July 30, 2023, we were in compliance with the required covenants, which are non-financial in nature, under the outstanding notes.

Commercial Paper

We have a \$575 million commercial paper program to support general corporate purposes. As of July 30, 2023, we had not issued any commercial paper.

Note 13 - Commitments and Contingencies

Purchase Obligations

Our purchase obligations reflect our commitments to purchase components used to manufacture our products, including long-term supply and capacity agreements, certain software and technology licenses, other goods and services and long-lived assets.

As of July 30, 2023, we had outstanding inventory purchase and long-term supply and capacity obligations totaling \$11.15 billion. During the normal course of business, to manage manufacturing lead times and help ensure adequate supply, we enter into agreements with contract manufacturers that allow them to procure inventory based upon criteria as defined by us, and in certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

placed, but these changes may result in the payment of costs incurred through the date of cancellation. Other non-inventory purchase obligations of \$4.31 billion include \$3.50 billion of multi-year cloud service agreements.

Total future purchase commitments as of July 30, 2023 are as follows:

	Commitments
	<i>(In millions)</i>
Fiscal Year:	
2024 (excluding first half of fiscal year 2024)	\$ 8,439
2025	3,960
2026	957
2027	999
2028	637
2029 and thereafter	468
Total	<u>\$ 15,460</u>

Accrual for Product Warranty Liabilities

The estimated amount of product warranty liabilities was \$115 million and \$82 million as of July 30, 2023 and January 29, 2023, respectively. The estimated product returns and estimated product warranty activity consisted of the following:

	Three Months Ended		Six Months Ended	
	July 30, 2023	July 31, 2022	July 30, 2023	July 31, 2022
	<i>(In millions)</i>			
Balance at beginning of period	\$ 77	\$ 55	\$ 82	\$ 46
Additions	42	122	55	138
Utilization	(4)	(9)	(22)	(16)
Balance at end of period	<u>\$ 115</u>	<u>\$ 168</u>	<u>\$ 115</u>	<u>\$ 168</u>

In connection with certain agreements that we have entered in the past, we have provided indemnities for matters such as tax, product, and employee liabilities. We have included intellectual property indemnification provisions in our technology-related agreements with third parties. Maximum potential future payments cannot be estimated because many of these agreements do not have a maximum stated liability. We have not recorded any liability in our Condensed Consolidated Financial Statements for such indemnifications.

Litigation

Securities Class Action and Derivative Lawsuits

The plaintiffs in the putative securities class action lawsuit, captioned 4:18-cv-07669-HSG, initially filed on December 21, 2018 in the United States District Court for the Northern District of California, and titled In Re NVIDIA Corporation Securities Litigation, filed an amended complaint on May 13, 2020. The amended complaint asserted that NVIDIA and certain NVIDIA executives violated Section 10(b) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and SEC Rule 10b-5, by making materially false or misleading statements related to channel inventory and the impact of cryptocurrency mining on GPU demand between May 10, 2017 and November 14, 2018. Plaintiffs also alleged that the NVIDIA executives who they named as defendants violated Section 20(a) of the Exchange Act. Plaintiffs sought class certification, an award of unspecified compensatory damages, an award of reasonable costs and expenses, including attorneys' fees and expert fees, and further relief as the Court may deem just and proper. On March 2, 2021, the district court granted NVIDIA's motion to dismiss the complaint without leave to amend, entered judgment in favor of NVIDIA and closed the case. On March 30, 2021, plaintiffs filed an appeal from judgment.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

in the United States Court of Appeals for the Ninth Circuit, case number 21-15604. On August 25, 2023, a majority of a three-judge Ninth Circuit panel affirmed in part and reversed in part the district court's dismissal of the case, with a third judge dissenting on the basis that the district court did not err in dismissing the case.

The putative derivative lawsuit pending in the United States District Court for the Northern District of California, captioned 4:19-cv-00341-HSG, initially filed January 18, 2019 and titled In re NVIDIA Corporation Consolidated Derivative Litigation, was stayed pending resolution of the plaintiffs' appeal in the In Re NVIDIA Corporation Securities Litigation action. On February 22, 2022, the court administratively closed the case, but stated that it would reopen the case once the appeal in the In Re NVIDIA Corporation Securities Litigation action is resolved. The lawsuit asserts claims, purportedly on behalf of us, against certain officers and directors of the Company for breach of fiduciary duty, unjust enrichment, waste of corporate assets, and violations of Sections 14(a), 10(b), and 20(a) of the Exchange Act based on the dissemination of allegedly false and misleading statements related to channel inventory and the impact of cryptocurrency mining on GPU demand. The plaintiffs are seeking unspecified damages and other relief, including reforms and improvements to NVIDIA's corporate governance and internal procedures.

The putative derivative actions initially filed September 24, 2019 and pending in the United States District Court for the District of Delaware, Lipchitz v. Huang, et al. (Case No. 1:19-cv-01795-UNA) and Nelson v. Huang, et. al. (Case No. 1:19-cv-01798- UNA), remain stayed pending resolution of the plaintiffs' appeal in the In Re NVIDIA Corporation Securities Litigation action. The lawsuits assert claims, purportedly on behalf of us, against certain officers and directors of the Company for breach of fiduciary duty, unjust enrichment, insider trading, misappropriation of information, corporate waste and violations of Sections 14(a), 10(b), and 20(a) of the Exchange Act based on the dissemination of allegedly false, and misleading statements related to channel inventory and the impact of cryptocurrency mining on GPU demand. The plaintiffs seek unspecified damages and other relief, including disgorgement of profits from the sale of NVIDIA stock and unspecified corporate governance measures.

Accounting for Loss Contingencies

As of July 30, 2023, we have not recorded any accrual for contingent liabilities associated with the legal proceedings described above based on our belief that liabilities, while possible, are not probable. Further, except as specifically described above, any possible loss or range of loss in these matters cannot be reasonably estimated at this time. We are engaged in legal actions not described above arising in the ordinary course of business and, while there can be no assurance of favorable outcomes, we believe that the ultimate outcome of these actions will not have a material adverse effect on our operating results, liquidity or financial position.

Note 14 - Shareholders' Equity

Capital Return Program

During the second quarter and first half of fiscal year 2024, we repurchased 7.5 million shares of our common stock for \$3.28 billion. During the second quarter and first half of fiscal year 2023, we repurchased 19 million and 28 million shares for \$3.35 billion and \$5.34 billion, respectively. Since the inception of our share repurchase program through July 30, 2023, we have repurchased an aggregate of 1.11 billion shares for a total cost of \$20.40 billion. As of July 30, 2023, we were authorized, subject to certain specifications, to repurchase shares of our common stock up to \$3.95 billion. On August 21, 2023, our Board of Directors approved an increase to our share repurchase program of an additional \$25.00 billion, without expiration. From July 31, 2023 through August 24, 2023, we repurchased 2 million shares for \$998 million pursuant to a Rule 10b5-1 trading plan. As of August 24, 2023, a total of \$27.95 billion was available for repurchase. Our share repurchase program aims to offset dilution from shares issued to employees. We may pursue additional share repurchases as we weigh market factors and other investment opportunities.

During the second quarter and first half of fiscal year 2024, we paid \$99 million and \$199 million in cash dividends to our shareholders, respectively. During the second quarter and first half of fiscal year 2023, we paid \$100 million and \$200 million in cash dividends to our shareholders, respectively. Our cash dividend program and the payment of future cash dividends under that program are subject to our Board of Directors'

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

continuing determination that the dividend program and the declaration of dividends thereunder are in the best interests of our shareholders.

Note 15 - Segment Information

Our Chief Executive Officer, who is considered to be our chief operating decision maker, or CODM, reviews financial information presented on an operating segment basis for purposes of making decisions and assessing financial performance.

The Compute & Networking segment includes our Data Center accelerated computing platform; networking; automotive artificial intelligence, or AI, Cockpit, autonomous driving development agreements, and autonomous vehicle solutions; electric vehicle computing platforms; Jetson for robotics and other embedded platforms; NVIDIA AI Enterprise and other software; and cryptocurrency mining processors, or CMP.

The Graphics segment includes GeForce GPUs for gaming and PCs, the GeForce NOW game streaming service and related infrastructure, and solutions for gaming platforms; Quadro/NVIDIA RTX GPUs for enterprise workstation graphics; virtual GPU software for cloud-based visual and virtual computing; automotive platforms for infotainment systems; and Omniverse Enterprise software for building and operating 3D internet applications.

Operating results by segment include costs or expenses that are directly attributable to each segment, and costs or expenses that are leveraged across our unified architecture and therefore allocated between our two segments.

The "All Other" category includes the expenses that our CODM does not assign to either Compute & Networking or Graphics for purposes of making operating decisions or assessing financial performance. The expenses include stock-based compensation expense, acquisition-related and other costs, corporate infrastructure and support costs, acquisition termination cost, intellectual property related, or IP-related and legal settlement costs, contributions, and other non-recurring charges and benefits that our CODM deems to be enterprise in nature.

Our CODM does not review any information regarding total assets on a reportable segment basis. Depreciation and amortization expense directly attributable to each reportable segment is included in operating results for each segment. However, our CODM does not evaluate depreciation and amortization expense by operating segment and, therefore, it is not separately presented. There is no intersegment revenue. The accounting policies for segment reporting are the same as for our consolidated financial statements. The table below presents details of our reportable segments and the "All Other" category.

Revenue by geographic region is allocated to individual countries based on the billing location of the customer. End customer location may be different than our customer's billing location. The following table

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

summarizes information pertaining to our revenue from customers based on the invoicing address by geographic regions:

	Three Months Ended		Six Months Ended	
	July 30, 2023	July 31, 2022	July 30, 2023	July 31, 2022
	<i>(In millions)</i>			
Revenue:				
United States	\$ 6,043	\$ 1,988	\$ 8,428	\$ 3,921
Taiwan	2,839	1,204	4,635	3,981
China (including Hong Kong)	2,740	1,602	4,330	3,683
Other countries	1,885	1,910	3,306	3,407
Total revenue	<u>\$ 13,507</u>	<u>\$ 6,704</u>	<u>\$ 20,699</u>	<u>\$ 14,992</u>

One data center distributor customer represented approximately 17% and 13% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and was attributable to the Compute & Networking segment. There were no customers with 10% or more of total revenue for the second quarter and first half of fiscal year 2023.

A large cloud service provider, or CSP, which primarily purchases indirectly through multiple system integrators and distributors, is estimated to represent approximately 22% and 19% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and was attributable to our Compute & Networking segment.

Two customers accounted for 16% and 13% of our accounts receivable balance as of July 30, 2023. Two customers accounted for 14% and 11% of our accounts receivable balance as of January 29, 2023.

The following table summarizes information pertaining to our revenue by each of the specialized markets we serve:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements which are based on our management's beliefs and assumptions and on information currently available to our management. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "could," "goal," "would," "expect," "plan," "anticipate," "believe," "estimate," "project," "predict," "potential" and similar expressions intended to identify forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance, time frames or achievements to be materially different from any future results, performance, time frames or achievements expressed or implied by the forward-looking statements. We discuss many of these risks, uncertainties and other factors in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended January 29, 2023 in greater detail under the heading "Risk Factors" of such reports. Given these risks, uncertainties and other factors, you should not place undue reliance on these forward-looking statements. Also, these forward-looking statements represent our estimates and assumptions only as of the date of this filing. You should read this Quarterly Report on Form 10-Q completely and with the understanding that our actual future results may be materially different from what we expect. We hereby qualify our forward-looking statements by these cautionary statements. Except as required by law, we assume no obligation to update these forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.

All references to "NVIDIA," "we," "us," "our" or the "Company" mean NVIDIA Corporation and its subsidiaries.

© 2023 NVIDIA Corporation. All rights reserved. The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the risk factors set forth in Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended January 29, 2023 and Part II, Item 1A. "Risk Factors" of this Quarterly Report on Form 10-Q and our Condensed Consolidated Financial Statements and related Notes thereto, as well as other cautionary statements and risks described elsewhere in this Quarterly Report on Form 10-Q and our other filings with the SEC, before deciding to purchase or sell shares of our common stock.

Overview

Our Company and Our Businesses

Since our founding in 1993, NVIDIA has been a pioneer in accelerated computing. Our invention of the GPU in 1999 has sparked the growth of the PC gaming market, redefined computer graphics, ignited the era of modern AI and has fueled industrial digitalization across markets. NVIDIA is now a full-stack computing company with data-center-scale offerings that are reshaping industry.

Our two operating segments are "Compute & Networking" and "Graphics," as described in Note 15 of the Notes to Condensed Consolidated Financial Statements.

Headquartered in Santa Clara, California, NVIDIA was incorporated in California in April 1993 and reincorporated in Delaware in April 1998.

Recent Developments, Future Objectives and Challenges

Demand and Supply, Product Transitions, and New Products and Business Models

Demand for our data center systems and products has surged over the last two quarters and our demand visibility extends into next year. In order to meet this demand, we have increased our purchase obligations with existing suppliers, added new suppliers and entered into prepaid supply and capacity agreements. These increased purchase volumes and number of suppliers may create more supply chain complexity and execution risk. We expect our supply to increase each quarter through next year. We have entered and expect to continue to enter into supplier and capacity arrangements.

Product transitions are complex as we often ship both new and prior architecture products simultaneously and we and our channel partners prepare to ship and support new products. We are in various stages of transitioning the architecture of our Data Center, Professional Visualization, and

reducing channel inventory of prior architectures ahead of new product introductions can create reductions or volatility in our revenue. In addition, the bring up of new product architectures is complex due to functionality challenges and quality concerns not identified in manufacturing testing. These product quality issues may incur costs, increase our warranty costs, and delay further production of our architecture. While we have managed prior product transitions and have previously sold multiple product architectures at the same time, these transitions are difficult, may impair our ability to predict demand and impact our supply mix, and we may incur additional costs.

We build technology and products for use cases and applications that may be new or may not yet exist such as our Omniverse platform, third-party large language models, and generative AI models. We have recently begun offering enterprise customers NVIDIA DGX cloud services directly and through our network of partners, which includes cloud-based infrastructure and software and services for training and deploying AI models, and NVIDIA AI Foundations for customizable pretrained AI models. Our demand estimates for new use cases, applications, and services can be incorrect and create volatility in our revenue or supply levels, and we may not be able to generate significant revenue from these use cases, applications, and services. New technologies such as generative AI models have emerged, and while they have driven increased demand for Data Center compute infrastructure, the long-term trajectory is unknown.

Global Trade

During the third quarter of fiscal year 2023, the U.S. government, or the USG, announced license requirements that, with certain exceptions, impact exports to China (including Hong Kong and Macau) and Russia of our A100 and H100 integrated circuits, DGX or any other systems or boards which incorporate A100 or H100 integrated circuits. During the second quarter of fiscal year 2024, the USG informed us of an additional licensing requirement for a subset of A100 and H100 products destined to certain customers and other regions, including some countries in the Middle East. We have sold alternative products in China not subject to the license requirements, such as our A800 or H800 offerings.

Given the strength of demand for our products worldwide, we do not anticipate that additional export restrictions, if adopted, would have an immediate material impact on our financial results. However, over the long term, our results and competitive position may be harmed, and we may be effectively excluded from all or part of the China market if there are further changes in the USG's export controls, if customers in China do not want to purchase our alternative product offerings, if customers purchase product from competitors, if customers develop their own internal solution, if the USG does not grant licenses in a timely manner or denies licenses to significant customers, or if we incur significant transition costs.

While we work to enhance the resiliency and redundancy of our supply chain, which is currently concentrated in the Asia-Pacific, including China, Hong Kong, Korea and Taiwan, new export controls or changes to existing export controls could negatively impact our business.

Macroeconomic Factors

Macroeconomic factors, including inflation, increased interest rates, significant capital market volatility, global supply chain constraints and global economic and geopolitical developments, may have direct and indirect impacts on our results of operations. While difficult to isolate and quantify, these macroeconomic factors can impact our supply chain and manufacturing costs, employee wages, costs for capital equipment and value of our investments. Our product and solution pricing strategy generally does not fluctuate with short-term changes in our costs. Within our supply chain, we continuously manage product availability and costs with our vendors.

Second Quarter of Fiscal Year 2024 Summary

Three Months Ended

	July 30, 2023	April 30, 2023	July 31, 2022	Quarter-over- Quarter Change	Year-over- Year Change
(\$ in millions, except per share data)					
Revenue	\$ 13,507	\$ 7,192	\$ 6,704	88 %	101 %
Gross margin	70.1 %	64.6 %	43.5 %	5.5 pts	26.6 pts
Operating expenses	\$ 2,662	\$ 2,508	\$ 2,416	6 %	10 %
Operating income	\$ 6,800	\$ 2,140	\$ 499	218 %	1,263 %
Net income	\$ 6,188	\$ 2,043	\$ 656	203 %	843 %
Net income per diluted share	\$ 2.48	\$ 0.82	\$ 0.26	202 %	854 %

We specialize in markets where our computing platforms can provide tremendous acceleration for applications. These platforms incorporate processors, interconnects, software, algorithms, systems, and services to deliver unique value. Our platforms address four large markets where our expertise is critical: Data Center, Gaming, Professional Visualization, and Automotive.

Revenue for the second quarter of fiscal year 2024 was \$13.51 billion, up 101% from a year ago and up 88% sequentially.

Data Center revenue was up 171% from a year ago and up 141% sequentially, led by CSPs and large consumer internet companies. Strong demand for the NVIDIA HGX platform based on our Hopper and Ampere GPU architectures was primarily driven by the development of large language models and generative AI. Data Center Compute grew 195% from a year ago and 157% sequentially, largely reflecting the strong ramp of our Hopper-based HGX platform. Networking was up 94% from a year ago and up 85% sequentially, primarily on strong growth in InfiniBand infrastructure to support our HGX platform. In the second quarter of fiscal year 2024, CSPs represented slightly more than half of our estimated Data Center end demand, with large consumer internet companies being the next largest end demand, followed by enterprise and high performance computing.

Gaming revenue was up 22% from a year ago and up 11% sequentially, primarily reflecting demand for our GeForce RTX 40 Series GPUs based on the NVIDIA Ada Lovelace architecture following normalization of channel inventory levels.

Professional Visualization revenue was down 24% from a year ago and up 28% sequentially. The year-on-year decrease primarily reflects lower sell-in to partners following normalization of channel inventory levels. The sequential increase was primarily due to stronger enterprise workstation demand and the ramp of NVIDIA RTX products based on the Ada Lovelace Architecture.

Automotive revenue was up 15% from a year ago and down 15% sequentially. The year-on-year increase was primarily driven by sales of self-driving platforms. The sequential decrease primarily reflects lower overall auto demand, particularly in China.

Gross margin increased from a year ago and sequentially, primarily reflecting growth in Data Center sales. The year-on-year increase also reflects the impact on the year-ago gross margin from \$1.34 billion in inventory provisions and related charges.

Operating expenses were up 10% from a year ago and up 6% sequentially, primarily driven by compensation and benefits, including stock-based compensation, reflecting growth in employees and compensation increases.

Market Platform Highlights

Data Center revenue for the second quarter of fiscal year 2024 was \$10.32 billion, up 171% from a year ago. We announced that the NVIDIA GH200 Grace Hopper Superchip is available in the third quarter of fiscal year 2024; announced the NVIDIA L40S GPU - a universal data center processor for compute-intensive applications, including AI training and inference, is available now; unveiled the NVIDIA MGX server reference design; announced NVIDIA Spectrum-X, an accelerated networking platform for AI; and partnered with a

range of companies on AI initiatives, including ServiceNow, Accenture, VMware, Snowflake, WPP, SoftBank, and Hugging Face.

Gaming revenue for the second quarter of fiscal year 2024 was \$2.49 billion, up 22% from a year ago. We began shipping the GeForce RTX 4060 family of GPUs; and announced NVIDIA Avatar Cloud Engine for Games, a custom AI model foundry service using AI-powered natural language interactions to transform games.

Professional Visualization revenue for the second quarter of fiscal year 2024 was \$379 million, down 24% from a year ago. We announced new NVIDIA RTX GPUs for desktop workstations based on the Ada Lovelace architecture; and a major release of the NVIDIA Omniverse platform.

Automotive revenue for the second quarter of fiscal year 2024 was \$253 million, up 15% from a year ago. We announced that NVIDIA DRIVE Orin is powering the new XPENG G6 Coupe SUVs; and announced a partnership with MediaTek, which will develop mainstream automotive systems on chips for global OEMs integrating a new NVIDIA GPU chiplet IP for AI and graphics.

Financial Information by Business Segment and Geographic Data

Refer to Note 15 of the Notes to Condensed Consolidated Financial Statements for disclosure regarding segment information.

Critical Accounting Policies and Estimates

Refer to Part II, Item 7, "Critical Accounting Policies and Estimates" of our Annual Report on Form 10-K for the fiscal year ended January 29, 2023. There have been no material changes to our Critical Accounting Policies and Estimates.

Results of Operations

The following table sets forth, for the periods indicated, certain items in our Condensed Consolidated Statements of Income expressed as a percentage of revenue.

	Three Months Ended		Six Months Ended	
	July 30, 2023	July 31, 2022	July 30, 2023	July 31, 2022
Revenue	100.0 %	100.0 %	100.0 %	100.0 %
Cost of revenue	29.9	56.5	31.8	44.3
Gross profit	70.1	43.5	68.2	55.7
Operating expenses				
Research and development	15.1	27.2	18.9	23.0
Sales, general and administrative	4.7	8.8	6.1	7.9
Acquisition termination cost	—	—	—	9.0
Total operating expenses	19.8	36.0	25.0	39.9
Operating income	50.3	7.5	43.2	15.8
Interest income	1.4	0.7	1.6	0.4
Interest expense	(0.5)	(1.0)	(0.6)	(0.9)
Other, net	0.4	(0.1)	0.2	(0.1)
Other income (expense), net	1.3	(0.4)	1.2	(0.6)
Income before income tax	51.6	7.1	44.4	15.2
Income tax expense (benefit)	5.9	(2.7)	4.6	—
Net income	45.7 %	9.8 %	39.8 %	15.2 %

Revenue

Revenue for the second quarter and first half of fiscal year 2024 was \$13.51 billion and \$20.70 billion, up 101% and 38%, respectively.

Revenue by Reportable Segments

	Three Months Ended				Six Months Ended			
	July 30, 2023	July 31, 2022	\$ Change	% Change	July 30, 2023	July 31, 2022	\$ Change	% Change
(\$ in millions)								
Compute & Networking	\$ 10,402	\$ 3,907	\$ 6,495	166 %	\$ 14,862	\$ 7,579	\$ 7,283	96 %
Graphics	3,105	2,797	308	11 %	5,837	7,413	(1,576)	(21)%
Total	\$ 13,507	\$ 6,704	\$ 6,803	101 %	\$ 20,699	\$ 14,992	\$ 5,707	38 %

Compute & Networking - The increase in the second quarter and first half of fiscal year 2024 compared to the second quarter and first half of fiscal year 2023 was primarily due to higher Data Center revenue. Compute GPUs grew 208% year-on-year and 112% compared to the first half of fiscal year 2023 led by demand for NVIDIA HGX platform based on our Hopper and Ampere GPU architecture for large language models and generative AI. Networking was up 94% year-on-year and 63% compared to the first half of last year driven primarily by strong growth in InfiniBand infrastructure to support our HGX platform.

Graphics - The increase in the second quarter of fiscal year 2024 compared to the second quarter of fiscal year 2023 primarily reflects growth in Gaming GPUs related to the demand for our GeForce RTX 40 Series GPUs based on the NVIDIA Ada Lovelace architecture following normalization of channel inventory levels. The decrease in the first half of fiscal year 2024 compared to the first half of fiscal year 2023 primarily reflects 16% lower Gaming GPU sales and 36% lower Professional Visualization GPU sales, due to lower sell-in to partners following normalization of channel inventory levels.

Concentration of Revenue

Revenue by geographic region is allocated to countries based on the billed location even if the revenue may be attributable to end customers in a different location. Revenue from sales to customers outside of the United States accounted for 55% and 59% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and 70% and 74% of total revenue for the second quarter and first half of fiscal year 2023, respectively. The increase in revenue to the United States for the second quarter and first half of fiscal year 2024 was primarily due to higher U.S.-based Data Center end demand.

Our customer and partner network incorporates original equipment manufacturers, original device manufacturers, system builders, system integrators, add-in board manufacturers, retailers/distributors, independent software vendors, internet and CSPs, automotive manufacturers and tier-1 automotive suppliers, mapping companies, start-ups, and other ecosystem participants. One data center distributor customer represented approximately 17% and 13% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and was attributable to the Compute & Networking segment. There were no customers with 10% or more of total revenue for the second quarter and first half of fiscal year 2023.

A large CSP, which primarily purchases indirectly through multiple system integrators and distributors, is estimated to represent approximately 22% and 19% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and was attributable to our Compute & Networking segment. Our estimated Compute & Networking end customer demand is concentrated among several large CSPs and consumer internet companies. Most of these large companies do not purchase directly from us but often purchase through multiple system integrators, distributors, and channel partners. We expect this concentration trend will continue.

Gross Margin

Our overall gross margin increased to 70.1% and 68.2% for the second quarter and first half of fiscal year 2024, respectively, from 43.5% and 55.7% for the second quarter and first half of fiscal year 2023, respectively. The increase in the second quarter and first half of fiscal year 2024 compared to second quarter and first half of fiscal year 2023 was primarily due to higher revenue from Compute GPUs of 208% and 112%, respectively, and lower inventory provisions.

Provisions for inventory and excess inventory purchase obligations totaled \$576 million and \$709 million for the second quarter and first half of fiscal year 2024, respectively. Sales of inventory that was previously written off or down, or settlements of excess inventory purchase obligations, totaled \$84 million and \$134 million for the second quarter and first half of fiscal year 2024, respectively. As a result, the overall net effect on our gross margin was an unfavorable impact of 3.6% and 2.8% in the second quarter and first half of fiscal year 2024, respectively.

Provisions for inventory and excess inventory purchase obligations totaled \$1.22 billion and \$1.31 billion for the second quarter and first half of fiscal year 2023, respectively. Sales of inventory that was previously written off or down, or settlements of excess inventory purchase obligations, totaled \$23 million and \$38 million for the second quarter and first half of fiscal year 2023, respectively. As a result, the overall net effect on our gross margin was an unfavorable impact of 17.8% and 8.5% in the second quarter and first half of fiscal year 2023, respectively.

Operating Expenses

	Three Months Ended				Six Months Ended			
	July 30, 2023	July 31, 2022	\$ Change	% Change	July 30, 2023	July 31, 2022	\$ Change	% Change
(\$ in millions)								
Research and development expenses	\$ 2,040	\$ 1,824	\$ 216	12 %	\$ 3,916	\$ 3,443	\$ 473	14 %
% of net revenue	15.1 %	27.2 %			18.9 %	23.0 %		
Sales, general and administrative expenses	622	592	30	5 %	1,253	1,183	70	6 %
% of net revenue	4.7 %	8.8 %			6.1 %	7.9 %		
Acquisition termination cost	—	—	—	— %	—	1,353	(1,353)	(100)%
% of net revenue	— %	— %			— %	9.0 %		
Total operating expenses	\$ 2,662	\$ 2,416	\$ 246	10 %	\$ 5,169	\$ 5,979	\$ (810)	(14)%
% of net revenue	19.8 %	36.0 %			25.0 %	39.9 %		

The increases in research and development expenses and sales, general and administrative expenses for the second quarter and first half of fiscal year 2024 were primarily driven by compensation and benefits, including stock-based compensation, reflecting employee growth and compensation increases.

Acquisition termination cost

We recorded an acquisition termination cost related to the Arm transaction of \$1.35 billion in fiscal year 2023 reflecting the write-off of the prepayment provided at signing.

Operating Income

Operating income for the second quarter and first half of fiscal year 2024 was \$6.80 billion and \$8.94 billion, respectively, up 1,263% and 278% from a year ago, respectively.

Operating income by Reportable Segments

	Three Months Ended				Six Months Ended			
	July 30, 2023	July 31, 2022	\$ Change	% Change	July 30, 2023	July 31, 2022	\$ Change	% Change
(\$ in millions)								
Compute & Networking	\$ 6,728	\$ 816	\$ 5,912	725 %	\$ 8,887	\$ 2,422	\$ 6,465	267 %

All Other	(1,139)	(974)	(165)	17 %	(2,204)	(3,188)	984	(31)%
Total	\$ 6,800	\$ 499	\$ 6,301	1,263 %	\$ 8,941	\$ 2,367	\$ 6,574	278 %

Compute & Networking – Segment operating income increased during the second quarter and first half of fiscal year 2024 compared to the second quarter and first half of fiscal year 2023 primarily due to higher revenues.

Graphics - Segment operating income increased during the second quarter of fiscal year 2024 compared to the second quarter of fiscal year 2023 primarily due to higher revenues of 11%. Segment operating income was also impacted by inventory provisions which were \$81 million in the second quarter of fiscal year 2024 compared to \$396 million in the second quarter of fiscal year 2023. Segment operating income decreased during the first half of fiscal year 2024 compared to the first half of fiscal year 2023 primarily due to lower revenues of 21%. Segment operating income was also impacted by inventory provisions which were \$125 million in the first half of fiscal year 2024 compared to \$416 million in the first half of fiscal year 2023.

All Other expenses increased during the second quarter of fiscal year 2024 compared to the second quarter of fiscal year 2023 primarily due to higher stock-based compensation expense. All Other expenses decreased during the first half of fiscal year 2024 compared to the first half of fiscal year 2023 primarily due to an acquisition termination cost of \$1.35 billion related to the Arm transaction in the prior year.

Other Income (Expense), Net

	Three Months Ended			Six Months Ended		
	July 30, 2023	July 31, 2022	\$ Change	July 30, 2023	July 31, 2022	\$ Change
	(\$ in millions)					
Interest income	\$ 187	\$ 46	\$ 141	\$ 338	\$ 64	\$ 274
Interest expense	(65)	(65)	—	(131)	(132)	1
Other, net	59	(5)	64	42	(19)	61
Other income (expense), net	<u>\$ 181</u>	<u>\$ (24)</u>	<u>\$ 205</u>	<u>\$ 249</u>	<u>\$ (87)</u>	<u>\$ 336</u>

Interest income consists of interest earned on cash, cash equivalents and marketable securities. The increase in interest income was primarily due to higher yields earned on our investments.

Interest expense is primarily comprised of coupon interest and debt discount amortization related to our notes.

Other, net, consists primarily of realized or unrealized gains and losses from investments in non-affiliated entities and the impact of changes in foreign currency rates. Change in other, net, compared to the second quarter and first half of fiscal year 2023 was primarily driven by mark-to-market gains from publicly traded equity investments.

Income Taxes

Income tax was an expense of \$793 million and \$958 million for the second quarter and first half of fiscal year 2024, respectively, a benefit of \$181 million for the second quarter of fiscal year 2023, and an expense of \$6 million for the first half of fiscal year 2023. The income tax as a percentage of income before income tax was an expense of 11.4% and 10.4% for the second quarter and first half of fiscal year 2024, respectively, a benefit of 38.0% for the second quarter of fiscal year 2023, and an expense of 0.3% for the first half of fiscal year 2023.

The increase in the effective tax rate was primarily due to a decreased impact of tax benefits from the foreign-derived intangible income deduction, stock-based compensation, and the U.S. federal research tax credit, relative to the increase in income before income tax.

Liquidity and Capital Resources

	July 30, 2023	January 29, 2023
	<i>(In millions)</i>	
Cash and cash equivalents	\$ 5,783	\$ 3,389
Marketable securities	10,240	9,907
Cash, cash equivalents and marketable securities	<u>\$ 16,023</u>	<u>\$ 13,296</u>

	Six Months Ended	
	July 30, 2023	July 31, 2022
	<i>(In millions)</i>	
Net cash provided by operating activities	\$ 9,259	\$ 3,001
Net cash provided by (used in) investing activities	\$ (1,287)	\$ 4,230
Net cash used in financing activities	\$ (5,479)	\$ (6,208)

As of July 30, 2023, we had \$16.02 billion in cash, cash equivalents, and marketable securities, an increase of \$2.73 billion from the end of fiscal year 2023. Our investment policy requires the purchase of highly rated fixed income securities, the diversification of investment types and credit exposures, and certain maturity limits on our portfolio.

Cash provided by operating activities increased in the first half of fiscal year 2024 compared to the first half of fiscal year 2023, primarily due to higher revenue and lower inventory, partially offset by higher accounts receivable. Accounts receivable in the second quarter of fiscal year 2024 benefited by approximately \$1.25 billion from customer payments received ahead of the invoice due date.

Cash used in investing activities increased in the first half of fiscal year 2024 compared to the first half of fiscal year 2023, primarily driven by lower marketable securities sales and maturities, partially offset by lower purchases of marketable securities.

Cash used in financing activities decreased in the first half of fiscal year 2024 compared to the first half of fiscal year 2023, which primarily reflects lower share repurchases partially offset by a debt repayment in the second quarter of fiscal year 2024.

Liquidity

Our primary sources of liquidity are our cash, cash equivalents, and marketable securities, and the cash generated by our operations. As of July 30, 2023, we had \$16.02 billion in cash, cash equivalents, and marketable securities. Our marketable securities consist of debt securities issued by the USG and its agencies, highly rated corporations and financial institutions, and foreign government entities, as well as certificates of deposit issued by highly rated financial institutions. These marketable securities are primarily denominated in U.S. dollars. Refer to Note 7 of the Notes to Condensed Consolidated Financial Statements for additional information. We believe that we have sufficient liquidity to meet our operating requirements for at least the next twelve months, and for the foreseeable future, including our debt obligations, future supply obligations and vendor and supplier prepayments. We continuously evaluate our liquidity and capital resources, including our access to external capital, to ensure we can finance future capital requirements.

Except for approximately \$1.38 billion of cash, cash equivalents, and marketable securities held outside the U.S. for which we have not accrued any related foreign or state taxes if we repatriate these amounts to the U.S., substantially all of our cash, cash equivalents and marketable securities held outside of the U.S. as of July 30, 2023 are available for use in the U.S. without incurring additional U.S. federal income taxes. We expect to pay approximately \$3.81 billion in cash taxes in the third quarter of fiscal year 2024 as we had previously deferred our federal income tax payments due to the disaster relief made available by the Internal Revenue Service for certain California taxpayers.

Primarily based upon increased cash tax payments, we expect that our cash flow from operations will decline in the third quarter of fiscal year 2024 compared to the second quarter of fiscal year 2024.

Capital Return to Shareholders

During the second quarter and first half of fiscal year 2024, we returned \$3.28 billion in share repurchases and \$99 million and \$199 million, respectively, in cash dividends. From July 31, 2023 through August 24, 2023, we repurchased 2 million shares for \$998 million pursuant to a Rule 10b5-1 trading plan.

Our cash dividend program and the payment of future cash dividends under that program are subject to the continuing determination by our Board of Directors that the dividend program and the declaration of dividends thereunder are in the best interests of our shareholders.

As of July 30, 2023, we were authorized, subject to certain specifications, to repurchase additional shares of our common stock up to \$3.95 billion. On August 21, 2023, our Board of Directors approved an increase to our share repurchase program of an additional \$25.00 billion, without expiration. As of August 24, 2023, a total of \$27.95 billion was available for repurchase. Our share repurchase program aims to offset dilution from shares issued to employees. We may pursue additional share repurchases as we weigh market factors and other investment opportunities. We plan to continue share repurchases this fiscal year.

The U.S. Inflation Reduction Act of 2022 was enacted on August 16, 2022 and requires a 1% excise tax on certain share repurchases in excess of shares issued for employee compensation made after December 31, 2022. We do not expect this provision to have a material effect on our consolidated financial statements.

Outstanding Indebtedness and Commercial Paper

Our aggregate debt maturities as of July 30, 2023, by year payable, are as follows:

	July 30, 2023
	<i>(In millions)</i>
Due in one year	\$ 1,250
Due in one to five years	2,250
Due in five to ten years	2,750
Due in greater than ten years	3,500
Unamortized debt discount and issuance costs	(45)
Net carrying amount	9,705
Less short-term portion	(1,249)
Total long-term portion	<u>\$ 8,456</u>

We have a \$575 million commercial paper program to support general corporate purposes. As of July 30, 2023, we had not issued any commercial paper.

Material Cash Requirements and Other Obligations

We have unrecognized tax benefits of \$1.25 billion, which includes related interest and penalties of \$128 million recorded in non-current income tax payable as of July 30, 2023. We are unable to reasonably estimate the timing of any potential tax liability, interest payments, or penalties in individual years due to uncertainties in the underlying income tax positions and the timing of the effective settlement of such tax positions. We are currently under examination by the Internal Revenue Service for our fiscal years 2018 and 2019. Refer to Note 6 of the Notes to Condensed Consolidated Financial Statements for further information.

Other than the contractual obligations described above, there were no material changes outside the ordinary course of business in our contractual obligations from those disclosed in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023. Refer to Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023 for a description of our contractual obligations. For a description of our operating lease obligations, long-term debt, and purchase obligations, refer to Note 3, Note 12, and Note 13 of the Notes to Condensed Consolidated Financial Statements, respectively.

Climate Change

To date, there has been no material impact to our results of operations associated with global sustainability regulations, compliance, costs from sourcing renewable energy or climate-related business trends.

Adoption of New and Recently Issued Accounting Pronouncements

There has been no adoption of any new and recently issued accounting pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Investment and Interest Rate Risk

Financial market risks related to investment and interest rate risk are described in Part II, Item 7A, “Quantitative and Qualitative Disclosures About Market Risk” in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023. As of July 30, 2023, there have been no material changes to the financial market risks described as of January 29, 2023.

Foreign Exchange Rate Risk

The impact of foreign currency transactions related to foreign exchange rate risk is described in Part II, Item 7A, “Quantitative and Qualitative Disclosures About Market Risk” in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023. As of July 30, 2023, there have been no material changes to the foreign exchange rate risks described as of January 29, 2023.

ITEM 4. CONTROLS AND PROCEDURES

Controls and Procedures

Disclosure Controls and Procedures

Based on their evaluation as of July 30, 2023, our management, including our Chief Executive Officer and Chief Financial Officer, has concluded that our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) and 15d-15(e)) were effective to provide reasonable assurance.

Changes in Internal Control Over Financial Reporting

There were no changes that occurred during the second quarter of fiscal year 2024 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. In fiscal year 2022, we began an upgrade of our enterprise resource planning, or ERP, system, which will update much of our existing core financial systems. The ERP system is designed to accurately maintain our financial records used to report operating results. The upgrade will occur in phases. We will continue to evaluate each quarter whether there are changes that materially affect our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls, will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within NVIDIA have been detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Refer to Part I, Item 1, Note 13 of the Notes to Condensed Consolidated Financial Statements for a discussion of significant developments in our legal proceedings since January 29, 2023. Also refer to Item 3, “Legal Proceedings” in our Annual Report on Form 10-K for the fiscal year ended January 29, 2023 for a prior discussion of our legal proceedings.

ITEM 1A. RISK FACTORS

Other than the risk factors listed below, there have been no material changes from the risk factors previously described under Item 1A of our Annual Report on Form 10-K for the fiscal year ended January 29, 2023 and Item 1A of our Quarterly Report on Form 10-Q for the fiscal quarter ended April 30, 2023.

Purchasing or owning NVIDIA common stock involves investment risks including, but not limited to, the risks described in Item 1A of our Annual Report on Form 10-K for the fiscal year ended January 29, 2023, in Item 1A of our Quarterly Report on Form 10-Q for the fiscal quarter ended April 30, 2023, and below. Additionally, any one of those risks could harm our business, financial condition and results of operations or reputation, which could cause our stock price to decline. Additional risks, trends and uncertainties not presently known to us or that we currently believe are immaterial may also harm our business, financial condition, results of operations or reputation.

Failure to meet the evolving needs of our industry and markets may adversely impact our financial results.

Our accelerated computing platforms experience rapid changes in technology, customer requirements, competitive products, and industry standards.

Our success depends on our ability to:

- timely identify industry changes, adapt our strategies, and develop new or enhance and maintain existing products and technologies that meet the evolving needs of these markets, including due to unexpected changes in industry standards or disruptive technological innovation that could render our products incompatible with products developed by other companies;
- develop or acquire new products and technologies through investments in research and development;
- launch new offerings with new business models including software, services and cloud solutions, as well as software-, infrastructure-, or platform-as-a-service solutions;
- expand the ecosystem for our products and technologies;
- meet evolving and prevailing customer and industry safety, security, reliability expectations, and compliance standards;
- manage product and software lifecycles to maintain customer and end user satisfaction;
- develop, acquire, and maintain the internal and external infrastructure needed to scale our business, including acquisition integrations, customer support, e-commerce, IP licensing capabilities and cloud service capacity; and
- complete technical, financial, operational, compliance, sales and marketing investments for the above activities.

We have invested in research and development in markets where we have a limited operating history, which may not produce meaningful revenue for several years, if at all. If we fail to develop or monetize new products and technologies, or if they do not become widely adopted, our financial results could be adversely affected. Obtaining design wins may involve a lengthy process and depend on our ability to anticipate and provide features and functionality that customers will demand. They also do not guarantee revenue. Failure to obtain a design win may prevent us from obtaining future design wins in subsequent generations. We cannot ensure that the products and technologies we bring to market will provide value to our customers and partners. If we fail any of these key success criteria, our financial results may be harmed.

We have recently begun offering enterprise customers NVIDIA DGX cloud services directly and through our network of partners, which includes cloud-based infrastructure and software and services for training and deploying AI models, and NVIDIA AI Foundations for customizable pretrained AI models. We have partnered with CSPs to host these software and services in their data centers, and we entered and may continue to enter into multi-year cloud service agreements to support these offerings and our research and development activities. The timing and availability of these cloud services has changed and may continue to change, impacting our revenue, expenses and development timelines. NVIDIA DGX cloud

services may not be successful and will take time, resources and investment. We also offer or plan to offer standalone software

solutions including NVIDIA AI Enterprise, NVIDIA Omniverse, NVIDIA DRIVE, and several other software solutions. These new business models or strategies may not be successful and we may fail to sell any meaningful standalone software or services. We may incur significant costs and may not achieve any significant revenue from these offerings.

Failure to estimate customer demand properly has led and could lead to mismatches between supply and demand.

We use third parties to manufacture and assemble our products, and we have had and may in the future have long manufacturing lead times. We are not provided guaranteed wafer, component and capacity supply, and our supply deliveries and production may be non-linear within a quarter or year. If our estimates of customer demand are ultimately inaccurate, as we have experienced in the past, there could be a significant mismatch between supply and demand. This mismatch has resulted in both product shortages and excess inventory, has varied across our market platforms, and has significantly harmed our financial results.

We build finished products and maintain inventory in advance of anticipated demand. While we have in the past entered and may in the future enter into long-term supply and capacity commitments, we may not be able to secure sufficient commitments for capacity to address our business needs or our long-term demand expectations may change. Additionally, our ability to sell certain products has been and could be impeded if components from third parties that are necessary for the finished product are not available. This risk may increase as a result of our platform strategy. In periods of shortages impacting the semiconductor industry and/or limited supply or capacity in our supply chain, the lead times on our orders may be extended. We have previously experienced extended lead times of more than 12 months. We have paid premiums and provided deposits to secure future supply and capacity, which have increased our product costs and may continue to do so. We may not have the ability to reduce our supply commitments at the same rate or at all if our revenue declines.

Many additional factors have caused and/or could in the future cause us to either underestimate or overestimate our customers' future demand for our products, or otherwise cause a mismatch between supply and demand for our products and impact the timing and volume of our revenue, including:

- competing technologies and competitor product releases and announcements;
- changes in business and economic conditions resulting in decreased end demand;
- sudden or sustained government lockdowns or actions to control case spread of global or local health issues;
- rapidly changing technology or customer requirements;
- time to market;
- new product introductions and transitions resulting in less demand for existing products;
- new or unexpected end use cases;
- increase in demand for competitive products, including competitive actions;
- business decisions made by third parties;
- the demand for accelerated or AI-related cloud services, including our own software and NVIDIA DGX cloud services;
- changes that impact the ecosystem for the architectures underlying our products and technologies;
- the demand for our products relating to cryptocurrency mining, our Omniverse platform, third-party large language models and generative AI models; or
- government actions or changes in governmental policies, such as increased restrictions on gaming usage.

Demand for our data center systems and products has surged over the last two quarters and our demand visibility extends into next year. In order to meet this demand, we have increased our purchase obligations

with existing suppliers, added new suppliers, and entered into prepaid supply and capacity agreements. These increased purchase volumes and number of suppliers may create more supply chain complexity and execution risk. We expect our supply to increase each quarter through next year. We have entered and expect to continue to enter into supplier and capacity arrangements. We may incur inventory provisions or impairments if our inventory or supply and capacity commitments are impacted by changes in demand for our products.

Our customer orders and longer-term demand estimates may change or may not be correct, as we have experienced in the past. Product transitions are complex and can impact our revenue as we often ship both new and prior architecture products simultaneously and we and our channel partners prepare to ship and support new products. Our architecture transitions of Data Center, Professional Visualization, and Gaming products may impair our ability to predict demand and impact our supply mix. Qualification time for new products, customers anticipating product transitions and channel partners reducing channel inventory of prior architectures ahead of new product introductions can create reductions or volatility in our revenue. We have experienced and may in the future experience reduced demand for current generation architectures when customers anticipate transitions, and we may be unable to sell multiple product architectures at the same time for current and future architecture transitions. If we are unable to execute our architectural transitions as planned for any reason, our financial results may be negatively impacted. In addition, the bring up of new product architectures is complex due to functionality challenges and quality concerns not identified in manufacturing testing. These product quality issues may incur costs, increase our warranty costs, and delay further production of our architecture. While we have managed prior product transitions and have previously sold multiple product architectures at the same time, these transitions are difficult, and we may incur additional costs.

We sell most of our products through channel partners, who sell to distributors, retailers, and/or end customers. As a result, the decisions made by our channel partners, distributors, retailers, and in response to changing market conditions and changes in end user demand for our products have impacted and could in the future continue to impact our ability to properly forecast demand, particularly as they are based on estimates provided by various downstream parties.

If we underestimate our customers' future demand for our products, our foundry partners may not have adequate lead-time or capacity to increase production and we may not be able to obtain sufficient inventory to fill orders on a timely basis. Even if we are able to increase production levels to meet customer demand, we may not be able to do so in a timely manner, or our contract manufacturers may experience supply constraints. If we cannot procure sufficient supply to meet demand or otherwise fail to fulfill our customers' orders on a timely basis, or at all, our customer relationships could be damaged, we could lose revenue and market share and our reputation could be harmed. Additionally, since some of our products are part of a complex data center buildout, supply constraints or availability issues with respect to any one component have had and may have a broader revenue impact.

If we overestimate our customers' future demand for our products, or if customers cancel or defer orders or choose to purchase from our competitors, we may not be able to reduce our inventory or other contractual purchase commitments. In the past, we have experienced a reduction in average selling prices, including due to channel pricing programs that we have implemented and may continue to implement, as a result of our overestimation of future demand, and we may need to continue these reductions. We have had to increase prices for certain of our products as a result of our suppliers' increase in prices, and we may need to continue to do so for other products in the future. We have also written-down our inventory, incurred cancellation penalties, and recorded impairments. These impacts were amplified by our placement of non-cancellable and non-returnable purchasing terms, well in advance of our historical lead times and could be exacerbated if we need to make changes to the design of future products. The risk of these impacts has increased and may continue to increase as our purchase obligations and prepaids have grown and are expected to continue to grow and become a greater portion of our total supply. All of these factors may negatively impact our gross margins and financial results.

We build technology and products for use cases and applications that may be new or may not yet exist, such as NVIDIA DGX cloud services, our Omniverse platform, third-party large language models and generative AI models. Our demand estimates for new use cases, applications, and services can be incorrect and create volatility in our revenue or supply levels, and we may not be able to generate significant revenue from these use cases, applications, and services. New technologies such as generative AI models have emerged, and while they have driven increased demand for Data Center compute infrastructure, the long-term trajectory is

unknown. Because our products may be used in multiple use cases and applications, it is difficult for us to estimate with any reasonable degree of precision the impact of generative AI models on our reported revenue or forecasted demand. Additionally, we expect to start shipping our CPU product offerings, the Grace CPU and Grace Hopper Superchips, in the third quarter of fiscal year 2024. Our ability to adequately predict our CPU demand may create volatility in our revenue or supply levels.

Challenges in estimating demand could become more pronounced or volatile in the future on both a global and regional basis. Extended lead times may occur if we experience other supply constraints caused by natural disasters, pandemics or other events. In addition, geopolitical tensions, such as those involving Taiwan and China, which comprise a significant portion of our revenue and where we have suppliers, contract manufacturers, and assembly partners who are critical to our supply continuity, could have a material adverse impact on us.

The use of our GPUs other than that for which they were designed and marketed, including new and unexpected use cases, has impacted and can in the future impact demand for our products, including by leading to inconsistent spikes and drops in demand. For example, several years ago, our Gaming GPUs began to be used for mining digital currencies such as Ethereum. It is difficult for us to estimate with any reasonable degree of precision the past or current impact of cryptocurrency mining, or forecast the future impact of cryptocurrency mining, on demand for our products. Volatility in the cryptocurrency market, including new compute technologies, price changes in cryptocurrencies, government cryptocurrency policies and regulations, new cryptocurrency standards, and changes in the method of verifying blockchain transactions, has impacted and can in the future impact cryptocurrency mining and demand for our products and can further impact our ability to estimate demand for our products. Changes to cryptocurrency standards and processes including, but not limited to, the Ethereum 2.0 merge in 2022, have reduced and may in the future decrease the usage of GPUs for Ethereum mining. This has created and may in the future create increased aftermarket sales of our GPUs, which could negatively impact retail prices for our GPUs and reduce demand for our new GPUs. We previously introduced Lite Hash Rate, or LHR, GeForce GPUs with limited Ethereum mining capability and provided CMP products in an effort to address demand from gamers and direct miners to CMP. Following the Ethereum 2.0 merge, NVIDIA Ampere and Ada Lovelace GPU architectures no longer include LHR. In general, our new products or previously sold products may be resold online or on the unauthorized “gray market,” which also makes demand forecasting difficult. Gray market products and reseller marketplaces compete with our new products and distribution channels.

Additionally, we depend on developers, customers, and other third parties to build, enhance, and maintain accelerated computing applications that leverage our platforms. We also rely on third-party content providers and publishers to make their content available on our platforms such as GeForce NOW. Failure by developers, customers, and other third parties to build, enhance, and maintain applications that leverage our platforms, or failure by third-party content providers or publishers to make their content available on reasonable terms or at all for use by our customers or end users on our platforms, could adversely affect customer demand.

Dependency on third-party suppliers and their technology to manufacture, assemble, test, or package our products reduces our control over product quantity and quality, manufacturing yields, development, enhancement and product delivery schedules and could harm our business.

We depend on foundries to manufacture our semiconductor wafers using their fabrication equipment and techniques. We do not assemble, test or package our products, but instead contract with independent subcontractors. These subcontractors assist with procuring components used in our systems, boards, and products. We face several risks which have adversely affected or could adversely affect our ability to meet customer demand and scale our supply chain, negatively impact longer-term demand for our products and services, and adversely affect our business operations, gross margin, revenue and/or financial results, including:

- lack of guaranteed supply of wafer, component and capacity or decommitment and potential higher wafer and component prices, from incorrectly estimating demand and failing to place orders with our suppliers with sufficient quantities or in a timely manner;
- failure by our foundries or contract manufacturers to procure raw materials or to provide adequate levels of manufacturing or test capacity for our products;

- failure by our foundries to develop, obtain or successfully implement high quality process technologies, including transitions to smaller geometry process technologies such as advanced process node technologies and memory designs needed to manufacture our products;
- limited number and geographic concentration of global suppliers, foundries, contract manufacturers, assembly and test providers, and memory manufacturers;
- loss of a supplier and additional expense and/or production delays as a result of qualifying a new foundry or subcontractor and commencing volume production or testing in the event of a loss of or a decision to add or change a supplier;
- lack of direct control over product quantity, quality and delivery schedules;
- suppliers or their suppliers failing to supply high quality products and/or making changes to their products without our qualification;
- delays in product shipments, shortages, a decrease in product quality and/or higher expenses in the event our subcontractors or foundries prioritize our competitors' or other customers' orders over ours;
- requirements to place orders that are not cancellable upon changes in demand or requirements to prepay for supply in advance;
- low manufacturing yields resulting from a failure in our product design or a foundry's proprietary process technology; and
- disruptions in manufacturing, assembly and other processes due to closures related to heat waves or other natural disasters and electricity conservation efforts.

International sales and operations are a significant part of our business, which exposes us to risks that could harm our business.

We sell our products internationally, and we also have operations and conduct business internationally. Our semiconductor wafers are manufactured, assembled, tested and packaged by third parties located outside of the United States, and we generated 55% and 59% of our revenue during the second quarter and first half of fiscal year 2024 from sales outside of the United States, respectively. The global nature of our business subjects us to a number of risks and uncertainties, which have had in the past and could in the future have a material adverse effect on our business, financial condition and results of operations, including domestic and international economic and political conditions between countries in which we and our suppliers and manufacturers do business, government lockdowns to control case spread of global or local health issues, differing legal standards with respect to protection of IP and employment practices, domestic and international business and cultural practices that differ, disruptions to capital markets, counter-inflation policies, and/or currency fluctuations, and natural disasters, acts of war or other military actions, terrorism, public health issues, and other catastrophic events.

Business disruptions could harm our operations, lead to a decline in revenue and increase our costs.

Our worldwide operations could be disrupted by natural disasters and extreme weather conditions, power or water shortages, telecommunications failures, supplier disruptions, terrorist attacks, or acts of violence, political and/or civil unrest, acts of war or other military actions, epidemics or pandemics, abrupt regulatory deterioration, and other natural or man-made disasters and catastrophic events. Our corporate headquarters, a large portion of our current data center capacity, and a portion of our research and development activities are located in California, and other critical business operations, finished goods inventory, and some of our suppliers are located in Asia, making our operations vulnerable to natural disasters such as earthquakes, wildfires, or other business disruptions occurring in these geographical areas. Catastrophic events can also have an impact on third-party vendors who provide us critical infrastructure services for IT and research and development systems and personnel. Geopolitical and domestic political developments and other events beyond our control, can increase economic volatility globally. Political instability, changes in government or adverse political developments in or around any of the major countries in which we do business may harm our business, financial condition and results of operations. Worldwide geopolitical tensions and conflicts, including but not limited to China, Hong Kong, Israel, Korea and Taiwan where the manufacture of our product components and final assembly of our products are concentrated may result in changing regulatory

requirements, and other disruptions that could impact our operations and operating strategies, product demand, access to global markets, hiring, and profitability. For example, other countries have restricted and may continue in the future to restrict business with the State of Israel, where we have engineering, sales support operations and manufacturing, and companies with Israeli operations, including by economic boycotts. Our operations could be harmed and our costs could increase if manufacturing, logistics or other operations are disrupted for any reason, including natural disasters, high heat events or water shortages, power shortages, information technology system failures, military actions or economic, business, labor, environmental, public health, or political issues. The ultimate impact on us, our third-party foundries and other suppliers of being located and consolidated in certain geographical areas is unknown. In the event a disaster, war or catastrophic event affects us, the third-party systems on which we rely, or our customers, our business could be harmed as a result of declines in revenue, increases in expenses, and substantial expenditures and time spent to fully resume operations. All of these risks and conditions could materially adversely affect our future sales and operating results.

Additionally, interruptions or delays in services from CSPs, data center co-location partners, and other third parties on which we rely, including due to the events described above or other events such as the insolvency of these parties, could impair our ability to provide our products and services and harm our business. As we increase our reliance on these third-party systems and services, our exposure to damage from service interruptions, defects, disruptions, outages, shortages and other performance and quality problems may increase. Data centers depend on access to clean water and predictable energy. Power or water shortages, or regulations that limit energy or water availability, could impair the ability of our customers to expand their data center capacity and consume our products and services.

We may not be able to realize the potential benefits of business investments or acquisitions, and we may not be able to successfully integrate acquisition targets, which could hurt our ability to grow our business, develop new products or sell our products.

We have acquired and invested and may continue to do so in businesses that offer products, services and technologies that we believe will help expand or enhance our existing strategic objectives. Acquisitions or investments involve significant challenges and risks and could impair our ability to grow our business, develop new products or sell our products and ultimately could have a negative impact on our financial results. If we pursue a particular transaction, we may limit our ability to enter into other transactions that could help us achieve our other strategic objectives. If we are unable to timely complete acquisitions, including due to delays and challenges in obtaining regulatory approvals, we may be unable to pursue other transactions, we may not be able to retain critical talent from the target company, technology may evolve and make the acquisition less attractive, and other changes can take place which could reduce the anticipated benefits of the transaction and negatively impact our business. Regulators could also impose conditions that reduce the ultimate value of our acquisitions. In addition, to the extent that our perceived ability to consummate acquisitions has been harmed, future acquisitions may be more difficult, complex or expensive. Further, if we hold investments in publicly traded companies, they could create volatility in our results and may generate losses up to the value of the investment. In addition, we have invested and may continue to invest in private companies to further our strategic objectives and to support certain key business initiatives. These companies can include early-stage companies still defining their strategic direction. Many of the instruments in which we invest are non-marketable and illiquid at the time of our initial investment, and we are not always able to achieve a return. To the extent any of the companies in which we invest are not successful, we could recognize an impairment and/or lose all or part of our investment. We face additional risks related to acquisitions and strategic investments, including the diversion of capital and other resources, including management's attention; difficulty in realizing a satisfactory return and uncertainties to realize the benefits of an acquisition or strategic investment, if at all; difficulty or inability in obtaining governmental, regulatory approval or restrictions or other consents and approvals or financing; legal proceedings initiated as a result of an acquisition or investment; and potential failure of our due diligence processes to identify significant issues with the assets or company in which we are investing or are acquiring.

Additional risks related to acquisitions include, but are not limited to:

- difficulty in integrating the technology, systems, products, policies, processes, or operations and integrating and retaining the employees, including key personnel, of the acquired business;
- assumption of liabilities and incurring amortization expenses, impairment charges to goodwill or write-downs of acquired assets;

- integrating accounting, forecasting and controls, procedures and reporting cycles;
- coordinating and integrating operations, particularly in countries in which we do not currently operate;
- stock price impact, fines, fees or reputation harm if we are unable to obtain regulatory approval for an acquisition or are otherwise unable to close an acquisition;
- potential issuances of debt to finance our acquisitions, resulting in increased debt, increased interest expense, and compliance with debt covenants or other restrictions;
- the potential for our acquisitions to result in dilutive issuances of our equity securities;
- the potential variability of the amount and form of any performance-based consideration;
- negative changes in general economic conditions in the regions or the industries in which we or our target operate;
- exposure to additional cybersecurity risks and vulnerabilities; and
- impairment of relationships with, or loss of our or our target's employees, vendors and customers.

For example, when integrating acquisition target systems into our own, we have experienced and may continue to experience challenges including lengthy and costly systems integration, delays in purchasing and shipping products, difficulties with system integration via electronic data interchange and other processes with our key suppliers and customers, and training and change management needs of integration personnel. These challenges have impacted our results of operations and may continue to do so in the future.

We receive a significant amount of our revenue from a limited number of partners and distributors and we have a concentration of sales to end customers, and our revenue could be adversely affected if we lose or are prevented from selling to any of these end customers.

We receive a significant amount of our revenue from a limited number of customers within our distribution and partner network. For example, one data center distributor customer represented approximately 17% and 13% of total revenue for the second quarter and first half of fiscal year 2024, respectively. With several of these distributors and partners, we are selling multiple target market platforms through their channels. Our operating results depend on sales within our partner network, as well as the ability of these partners to sell products that incorporate our processors. In the future, these partners may decide to purchase fewer products, not to incorporate our products into their ecosystem, or to alter their purchasing patterns in some other way. Because most of our sales are made on a purchase order basis, our customers can generally cancel, change or delay product purchase commitments with little notice to us and without penalty. Our partners or customers may develop their own solutions; our customers may purchase products from our competitors; and our partners may discontinue sales or lose market share in the markets for which they purchase our products, all of which may alter partners' or customers' purchasing patterns. A large CSP, which primarily purchases indirectly through multiple system integrators and distributors, is estimated to represent approximately 22% and 19% of total revenue for the second quarter and first half of fiscal year 2024, respectively, and was attributable to our Compute & Networking segment. Our estimated Compute & Networking end customer demand is concentrated among several large CSPs and consumer internet companies. Most of these large companies do not purchase directly from us but often purchase through multiple system integrators, distributors, and channel partners. We expect this concentration trend will continue. If end demand increases or our finished goods supply availability is concentrated near a quarter end, the system builders and channel partners may have limited ability to increase their credit, which could impact the timing and amount of our revenue. The loss of any of our large customers, a significant reduction in purchases by them, our inability to sell to a customer due to U.S. or other countries' trade restrictions, or any difficulties in collecting accounts receivable would likely harm our financial condition and results of operations.

Our operations could be affected by the complex laws, rules and regulations to which our business is subject, and political and other actions may adversely impact our business.

We are subject to laws and regulations domestically and worldwide, affecting our operations in areas including, but not limited to, IP ownership and infringement; taxes; import and export requirements and

tariffs; anti-corruption, including the Foreign Corrupt Practices Act; business acquisitions; foreign exchange controls and cash repatriation restrictions; data privacy requirements; competition and antitrust; advertising; employment; product regulations; cybersecurity; environmental, health, and safety requirements; the responsible use of AI; climate change; cryptocurrency; and consumer laws. Compliance with such requirements can be onerous and expensive, could impact our competitive position, and may negatively impact our business operations and ability to manufacture and ship our products. There can be no assurance that our employees, contractors, suppliers, customers or agents will not violate applicable laws or the policies, controls, and procedures that we have designed to help ensure compliance with such laws, and violations could result in fines, criminal sanctions against us, our officers, or our employees, prohibitions on the conduct of our business, and damage to our reputation. Changes to the laws, rules and regulations to which we are subject, or changes to their interpretation and enforcement, could lead to materially greater compliance and other costs and/or further restrictions on our ability to manufacture and supply our products and operate our business. For example, we may face increased compliance costs as a result of changes or increases in antitrust legislation, regulation, administrative rule making, increased focus from regulators on cybersecurity vulnerabilities and risks, and enforcement activity resulting from growing public concern over concentration of economic power in corporations. Revisions to laws or regulations or their interpretation and enforcement could also result in increased taxation, trade sanctions, the imposition of or increase to import duties or tariffs, restrictions and controls on imports or exports, or other retaliatory actions, which could have an adverse effect on our business plans or impact the timing of our shipments. Additionally, changes in the public perception of governments in the regions where we operate or plan to operate could negatively impact our business and results of operations.

Government actions, including trade protection and national security policies of U.S. and foreign government bodies, such as tariffs, import or export regulations, including deemed export restrictions and restrictions on the activities of U.S. persons, trade and economic sanctions, decrees, quotas or other trade barriers and restrictions could affect our ability to ship products, provide services to our customers and employees, do business without an export license with entities on the U.S. Department of Commerce's U.S. Entity List or other U.S. government restricted parties lists (which is expected to change from time to time), and generally fulfill our contractual obligations and have a material adverse effect on our business. If we were ever found to have violated export control laws or sanctions of the U.S. or similar applicable non-U.S. laws, even if the violation occurred without our knowledge, we may be subject to various penalties available under the laws, any of which could have a material and adverse impact on our business, operating results and financial condition.

For example, in response to the war in Ukraine, the United States and other jurisdictions imposed economic sanctions and export control measures which blocked the passage of our products, services and support into Russia, Belarus, and certain regions of Ukraine. In fiscal year 2023, we stopped direct sales to Russia and closed business operations in Russia. Concurrently, the war in Ukraine has impacted end customer sales in EMEA and may continue to do so in the future.

The increasing focus on the risks and strategic importance of AI technologies has already resulted in regulatory restrictions that target products and services capable of enabling or facilitating AI, and may in the future result in additional restrictions impacting some or all of our product and service offerings.

Concerns regarding third-party use of AI for purposes contrary to local governmental interests, including concerns relating to the misuse of AI applications, models, and solutions, could result in unilateral or multilateral restrictions on products that can be used for training, refining, and deploying large language models. Such restrictions could limit the ability of downstream customers and users worldwide to acquire, deploy, and use systems that include our products, software, and services, and negatively impact our business and financial results.

Such restrictions could include additional unilateral or multilateral export controls on certain products or technology, including but not limited to AI technologies. As geopolitical tensions have increased, semiconductors associated with AI, including GPUs and associated products, are increasingly the focus of export control restrictions proposed by stakeholders in the U.S. and its allies, and it is likely that additional unilateral or multilateral controls will be adopted. Such controls may be very broad in scope and application, prohibit us from exporting our products to any or all customers in one or more markets, including but not limited to China, and could negatively impact our manufacturing, testing, and warehousing locations and options, or could impose other conditions that limit our ability to serve demand abroad and could negatively and materially impact our business, revenue, and financial results. Export controls targeting GPUs and

semiconductors associated with AI, which are increasingly likely, would restrict our ability to export our technology, products, or services even though competitors may not be subject to similar restrictions, creating a competitive disadvantage for us and negatively impacting our business and financial results. Potential export controls targeting GPUs and semiconductors associated with AI may also subject downstream users of our products to additional restrictions on the use, resale, repair, or transfer of our products, negatively impacting our business and financial results. Controls could negatively impact our cost and/or ability to provide services such as NVIDIA AI cloud services and could impact the cost and/or ability of our cloud customers to provide services to their end customers, even outside China.

Export controls could disrupt our supply chain and distribution channels, negatively impacting our ability to serve demand, including in markets outside China and for our gaming products. Even the possibility of additional export controls may also negatively impact demand for our products, benefitting competitors that offer alternatives less likely to be restricted by further controls. Repeated changes in the export control rules are likely to impose compliance burdens on our business and our customers, negatively and materially impacting our business.

Increasing use of economic sanctions and export controls may also impact demand for our products or services, negatively impacting our business and financial results. Additional unilateral or multilateral controls are also likely to include deemed export control limitations that negatively impact the ability of our research and development teams to execute our roadmap or other objectives in a timely manner. Additional export restrictions may not only impact our ability to serve overseas markets, but also provoke responses from foreign governments, including China, that negatively impact our supply chain or our ability to provide our products and services to customers in all markets worldwide, which could also substantially reduce our revenue.

During the third quarter of fiscal year 2023, the USG announced export restrictions and export licensing requirements targeting China's semiconductor and supercomputing industries. These restrictions impact exports of certain chips, as well as software, hardware, equipment, and technology used to develop, produce, and manufacture certain chips, to China (including Hong Kong and Macau) and Russia, and specifically impact our A100 and H100 integrated circuits, DGX or any other systems or boards which incorporate A100 or H100 integrated circuits. The license requirements also apply to any future NVIDIA integrated circuit achieving certain peak performance and chip-to-chip I/O performance thresholds, as well as any system or board that includes those circuits. There are also now licensing requirements to export a wide array of products, including networking products, destined for certain end users and for certain end uses in China. During the second quarter of fiscal year 2024, the USG also informed us of an additional licensing requirement for a subset of A100 and H100 products destined to certain customers and other regions, including some countries in the Middle East.

Following these export controls, we transitioned some operations, including certain testing, validation, and supply and distribution operations out of China and Hong Kong. Any future transitions could be costly and time consuming, and adversely affect our research and development and supply and distribution operations, as well as our revenue, during any such transition period.

We have sold alternative products in China not subject to the license requirements, such as our A800 or H800 offerings. To the extent that a customer requires products covered by the license requirements, we may seek a license for the customer but have no assurance that the USG will grant such a license, or that the USG will act on the license application in a timely manner. The requirements have a disproportionate impact on NVIDIA and may disadvantage NVIDIA against certain of our competitors who sell products that are not subject to the new restrictions or may be able to acquire licenses for their products.

Management of these new license and other requirements is complicated and time consuming. Our results and competitive position may be harmed, especially over the long-term, if there are further changes in the USG's export controls, including further expansion of the geographic, customer, or product scope of the controls, if affected customers do not want to purchase our alternative product offerings, if customers purchase product from competitors, if customers develop their own internal solution, if we are unable to provide contractual warranty or other extended service obligations, if the USG does not grant licenses in a timely manner or denies licenses to significant customers, or if we incur significant transition costs. Additionally, if we are unable to sell our alternative product offerings to affected customers, we may have excess inventory, harming our results. Even if the USG grants any requested licenses, the licenses may be temporary or impose burdensome conditions that we cannot or choose not to fulfill. The new requirements

may benefit certain of our competitors, as the licensing process will make our pre-sale and post-sale technical support efforts more cumbersome and less certain, and encourage customers in China to pursue alternatives to our products, including semiconductor suppliers based in China, Europe, and Israel. Given the increasing strategic importance of AI and rising geopolitical tensions, the USG may unilaterally change the export control rules at any time and subject a wide range of our products, including but not limited to A800, H800, and gaming products to export restrictions and licensing requirements, negatively impacting our business and financial results. In the event of such change, we may be unable to sell our inventory of such products and may be unable to develop replacement products not subject to the license requirements, effectively excluding us from all or part of the China market. For example, the USG has reportedly been urged to impose conditions to limit the ability of foreign firms to create large-scale GPU clusters, for example by requiring chip tracking and throttling mechanisms that would disable or impair GPUs if certain system or use conditions are detected. Such restrictions would be technically and commercially infeasible, and if imposed by the USG, would effectively prevent exports of products exceeding the thresholds to impacted regions and customers. Export controls restricting our gaming products, may disrupt a significant portion of our supply and distribution chain and negatively impact sales of such products to markets outside China, including the U.S. and Europe. Export controls may disrupt our supply and distribution chain for a substantial portion of our products, which are warehoused in and distributed from Hong Kong. Export controls restricting our ability to sell datacenter GPUs may also negatively impact demand for our networking products used in servers containing our GPUs. The USG may also impose export controls on our networking products, such as high-speed network interconnects, to limit the ability of downstream parties to create large clusters for frontier model training. Any new control that impacts a wide range of our products, including but not limited to A800, H800, and gaming products would likely have a disproportionate impact on NVIDIA and may disadvantage us against certain of our competitors that sell chips that are outside the scope of such control. Excessive or shifting export controls may also encourage customers outside China and other impacted regions to “design-out” U.S. semiconductors from their products to reduce the compliance burden and risk, and to ensure that they are able to serve markets worldwide. As a result, excessive or shifting export controls may negatively impact demand for our products and services not only in China, but also in other markets, such as Europe, Latin America, and Southeast Asia. Excessive or shifting export controls increase the risk of investing in U.S. advanced semiconductor products, because by the time a new product is ready for market, it may be subject to new unilateral export controls restricting its sale. At the same time, such controls may increase investment in foreign competitors, which would be less likely to be restricted by U.S. controls.

Additionally, restrictions imposed by the Chinese government on the duration of gaming activities and access to games may adversely affect our Gaming revenue, and increased oversight of digital platform companies may adversely affect our Data Center revenue. The Chinese government may impose restrictions on the sale to certain end customers of our products, or any products containing components made by our partners and suppliers. For example, the Chinese government recently announced restrictions relating to certain sales of products containing certain products made by Micron, a supplier of ours. Further restrictions on our products or the products of our suppliers could negatively impact our business and financial results.

Finally, our business depends on our ability to receive consistent and reliable supply from our overseas partners, especially in Taiwan. Any new restrictions that negatively impact our ability to receive supply of components, parts, or services from Taiwan, would negatively impact our business and financial results.

Our business is exposed to the risks associated with litigation, investigations and regulatory proceedings.

We currently and will likely continue to face legal, administrative and regulatory proceedings, claims, demands and/or investigations involving shareholder, consumer, competition and/or other issues relating to our business. For example, we are defending a securities class action lawsuit from multiple shareholders asserting claims that we and certain of our officers made false and/or misleading statements related to channel inventory and the impact of cryptocurrency mining on GPU demand in 2017 and 2018. Litigation and regulatory proceedings are inherently uncertain, and adverse rulings could occur, including monetary damages or fines, or an injunction stopping us from manufacturing or selling certain products, engaging in certain business practices, or requiring other remedies, such as compulsory licensing of patents. An unfavorable outcome or settlement may result in a material adverse impact. Regardless of the outcome, litigation can be costly, time-consuming, and disruptive to our operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

During the second quarter of fiscal year 2024, we repurchased 7.5 million shares of our common stock for \$3.28 billion. Since the inception of our share repurchase program, we have repurchased an aggregate of 1.11 billion shares for a total cost of \$20.40 billion through July 30, 2023. As of July 30, 2023, we were authorized, subject to certain specifications, to repurchase shares of our common stock up to \$3.95 billion.

The repurchases can be made in the open market, in privately negotiated transactions, pursuant to a Rule 10b5-1 trading plan or in structured share repurchase programs, and can be made in one or more larger repurchases, in compliance with Rule 10b-18 of the Exchange Act, subject to market conditions, applicable legal requirements, and other factors. The program does not obligate NVIDIA to acquire any particular amount of common stock and the program may be suspended at any time at our discretion.

In the second quarter and first half of fiscal year 2024, we paid \$99 million and \$199 million, respectively, in cash dividends. Our cash dividend program and the payment of future cash dividends under that program are subject to our Board of Directors' continuing determination that the dividend program and the declaration of dividends thereunder are in the best interests of our shareholders.

The following table presents details of our share repurchase transactions during the second quarter of fiscal year 2024:

Period	Total Number of Shares Purchased (In millions)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (In millions)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (In billions)
May 1, 2023 - May 28, 2023	—	\$ —	—	\$ 7.23
May 29, 2023 - June 25, 2023	1.9	\$ 420.77	1.9	\$ 6.41
June 26, 2023 - July 30, 2023	5.6	\$ 440.19	5.6	\$ 3.95
Total	7.5		7.5	

On August 21, 2023, our Board of Directors approved an increase to our share repurchase program of an additional \$25.00 billion, without expiration. From July 31, 2023 through August 24, 2023, we repurchased 2 million shares for \$998 million pursuant to a Rule 10b5-1 trading plan. As of August 24, 2023, a total of \$27.95 billion was available for repurchase.

Restricted Stock Unit Share Withholding

We also withhold common stock shares associated with net share settlements to cover tax withholding obligations upon the vesting of restricted stock unit awards under our employee equity incentive program. During the second quarter and first half of fiscal year 2024, we withheld approximately 1 million and 3 million shares, respectively, for a total value of \$672 million and \$1.18 billion, respectively.

ITEM 5. OTHER INFORMATION

None of our directors or officers adopted or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement," as such terms are defined under Item 408(a) of Regulation S-K, during the second quarter of fiscal year 2024.

ITEM 6. EXHIBITS

Exhibit No.	Exhibit Description
31.1*	<u>Certification of Chief Executive Officer as required by Rule 13a-14(a) of the Securities Exchange Act of 1934</u>
31.2*	<u>Certification of Chief Financial Officer as required by Rule 13a-14(a) of the Securities Exchange Act of 1934</u>
32.1#*	<u>Certification of Chief Executive Officer as required by Rule 13a-14(b) of the Securities Exchange Act of 1934</u>
32.2#*	<u>Certification of Chief Financial Officer as required by Rule 13a-14(b) of the Securities Exchange Act of 1934</u>
101.INS*	Inline XBRL Instance Document - the instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
101.SCH*	Inline XBRL Taxonomy Extension Schema Document
101.CAL*	Inline XBRL Taxonomy Extension Calculation Linkbase Document
101.DEF*	Inline XBRL Taxonomy Extension Definition Linkbase Document
101.LAB*	Inline XBRL Taxonomy Extension Labels Linkbase Document
101.PRE*	Inline XBRL Taxonomy Extension Presentation Linkbase Document
104	Cover Page Interactive Data File - the cover page interactive data file does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.

* Filed herewith.

In accordance with Item 601(b)(32)(ii) of Regulation S-K and SEC Release Nos. 33-8238 and 34-47986, Final Rule: Management's Reports on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, the certifications furnished in Exhibits 32.1 and 32.2 hereto are deemed to accompany this Quarterly Report on Form 10-Q and will not be deemed "filed" for purpose of Section 18 of the Exchange Act. Such certifications will not be deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference.

Copies of above exhibits not contained herein are available to any shareholder upon written request to:

Investor Relations: NVIDIA Corporation, 2788 San Tomas Expressway, Santa Clara, CA 95051.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Date: August 25, 2023
